

DēSIGNA

FITILE

ITALIAN TILES DESIGN

[...] I segni sono invece delle forme appoggiate sul fondo, senza problemi di ambiguità percettiva, dove il valore è dato dall'energia, dal colore materico, dalle dimensioni, dai collegamenti, dagli spazi vuoti.

[Bruno Munari, Simultaneità degli opposti]

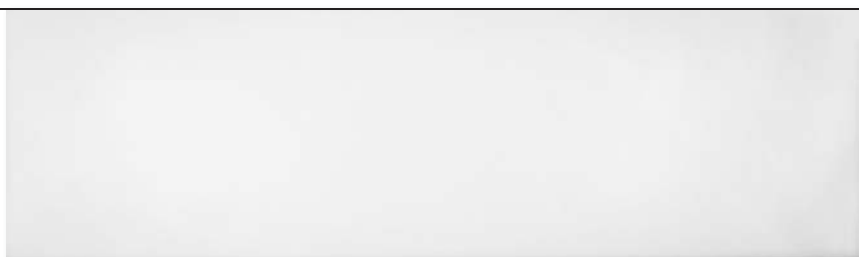

[...] Signs are instead shapes that touch the bottom, with no ambiguities in perception, where the value derives from the energy, the color, the sizes, the linkages, the empty spaces.

[Bruno Munari, Simultaneity of opposites]
